

Orca Installation Guide

Steps:

1.Download and install Anaconda for windows (miniconda does the job) from: https://repo.anaconda.com/miniconda/Miniconda3-latest-Windows-x86_64.exe

2.Use Anaconda Prompt (miniconda3) and run :

```
conda install -c plotly plotly-orca
```

3.After the installation, locate the folder that contains orca.exe and move it along with all the other files to /Program Files/python37/Scripts folder
